

5* WINTER OFFER 2010/11 ALGARVE – PORTUGAL

Le MERIDIEN

01 NOV – 04 MAR 2011

3 nights B&B + 3 green fees **only 235€** per person

This offer is based on 2 people sharing twin rooms including breakfast at the LA MERIDIEN PENINA 5* GOLF & RESORT including golf at the PENINA COURSES – **1 round at the Academy or Resort Course & 2 rounds at the Championship course.**

A pioneer among complexes of golf in the Algarve, **Le Méridien Penina 5* Golf & Resort** is the only hotel in Portugal, which has three golf courses in its 145 hectares (360 acres) of land.

Le Méridien Penina Golf & Resort features two conference rooms. With three golf courses designed by Sir Henry Cotton, including an 18-hole Championship Golf Course, the 360-acre estate includes six tennis courts, a FIFA-sized football field, and a jogging circuit.

Situated on Portugal's spectacular southern coast, Le Méridien Penina Golf & Resort is located between the traditional fishing port of Portimão and the historic town of Lagos. Located in the Algarve region, Portimão features warm seawater beaches and majestic rock formations. The nearest town, with shops, local entertainment and a casino, is just four kilometres from the resort.

The Penina Championship Golf Course. The Penina (now known as the Sir Henry Cotton Championship Course) was the first resort golf course to be built in Portugal and therefore is unquestionably where golf started in this southern corner of the Iberian Peninsula. Three times British Open champion, the late Sir Henry Cotton was encouraged to visit and lay out a course over a former rice field. On an unpromising wet, treeless site, Cotton grasped the opportunity to renew the British connection with golf in the country that had been established in the 19th century.

The entire resort has gained recognition by adopting environmental management practices and is a member of the Audubon Co-operative Sanctuary System. These best practices include the promotion of the natural flora in the fairway surrounding areas as well as the minimal use of chemical substances in order to preserve the soils, water, wild species and natural resources in general.
